

Mathematics Curriculum Progression Map

Number: Algebra

<u>EYFS</u>		<u>Year 1</u>	<u>Year 2</u>	<u>Year 3</u>	<u>Year 4</u>	<u>Year 5</u>	<u>Year 6</u>
<u>3-4 Year olds</u>	<u>Reception</u>						
<u>Equations</u>							
		<i>Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$ (cross reference - Addition and Subtraction)</i>	<i>Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (cross reference - Addition and Subtraction)</i>	<i>Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. (cross reference - Addition and Subtraction)</i> <i>Solve problems, including missing number problems, involving</i>		<i>Use the properties of rectangles to deduce related facts and find missing lengths and angles (cross reference- Geometry: Properties of Shapes)</i>	<i>Express missing number problems algebraically</i>

				<i>multiplication and division, including integer scaling (cross reference - Multiplication and Division)</i>			
			<i>Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 (cross reference - Addition and Subtraction)</i>				Find pairs of numbers that satisfy number sentences involving two unknowns
		<i>Represent and use number bonds and related subtraction facts within 20 (cross reference - Addition and Subtraction)</i>					Enumerate all possibilities of combinations of two variables
Formulae							
					<i>Perimeter can be expressed algebraically as</i>		Use simple formulae

					$2(a + b)$ where a and b are the dimensions in the same unit. (cross reference - Non-Statutory Guidelines measurement)		Recognise when it is possible to use formulae for area and volume of shapes (cross reference - Measurement)
Sequencing							
		Sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening (cross reference - Measurement)	Compare and sequence intervals of time (cross reference - Measurement) Order and arrange combinations of mathematical objects in patterns (cross reference - Geometry: position and direction)				Generate and describe linear number sequences
